

Diagonal

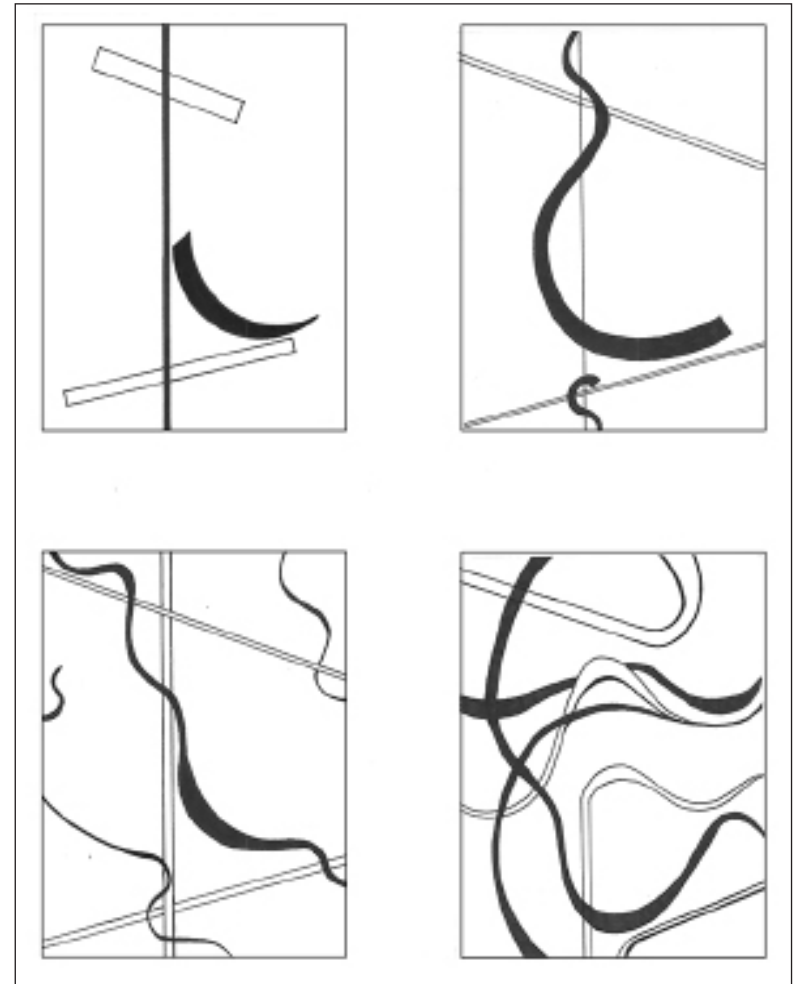

Straight

Project: 4 Lines, 4 Times

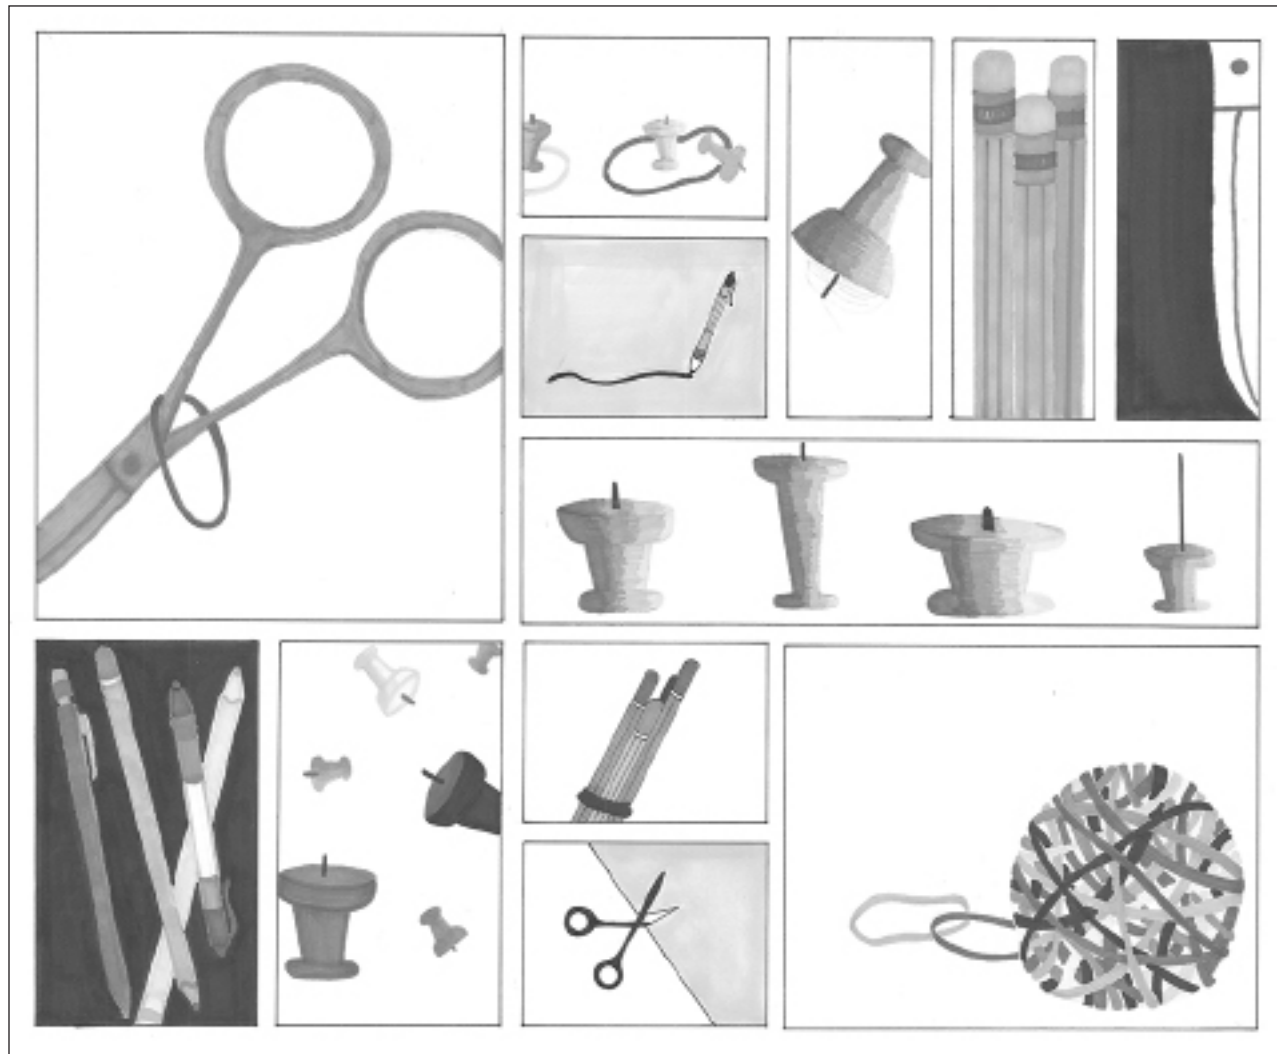

Objective: Use simple line types to create small compositions. Each composition should build on the previous one by adding different lines, tones, and thicknesses.

Curved

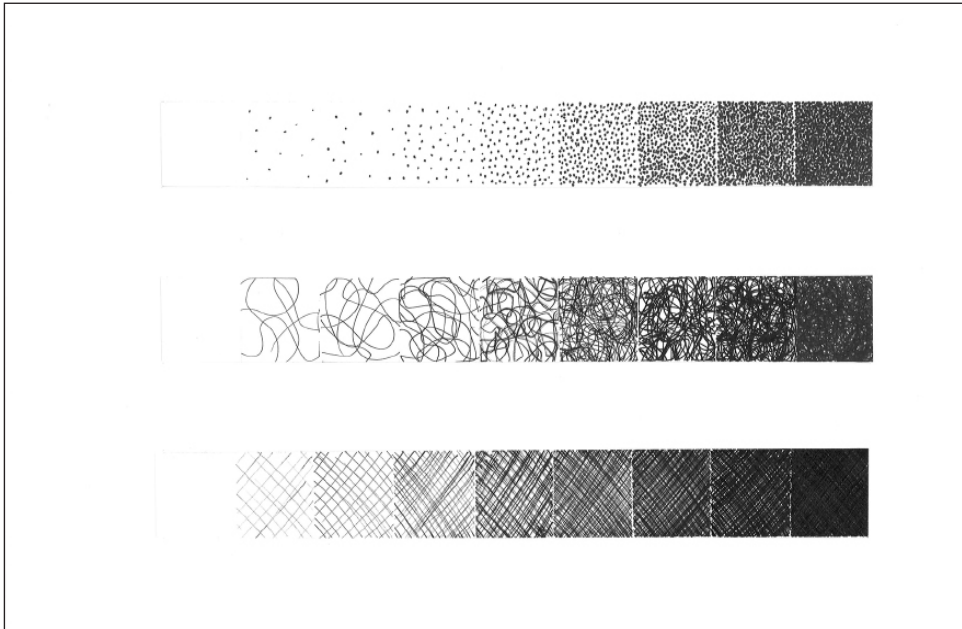

Combination

Project: Gestalt Grouping Laws

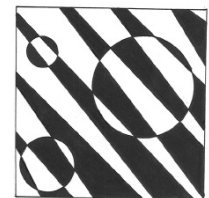

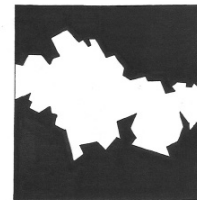

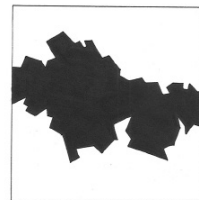

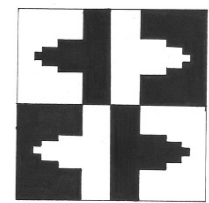

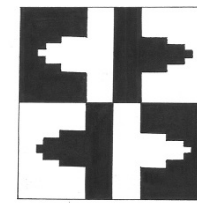

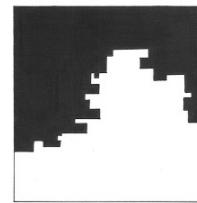

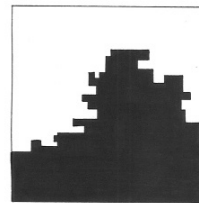

Objective: Create a series of mini-compositions that focus on using the gestalt grouping laws (similarity, proximity, continuation, closure, and containment).

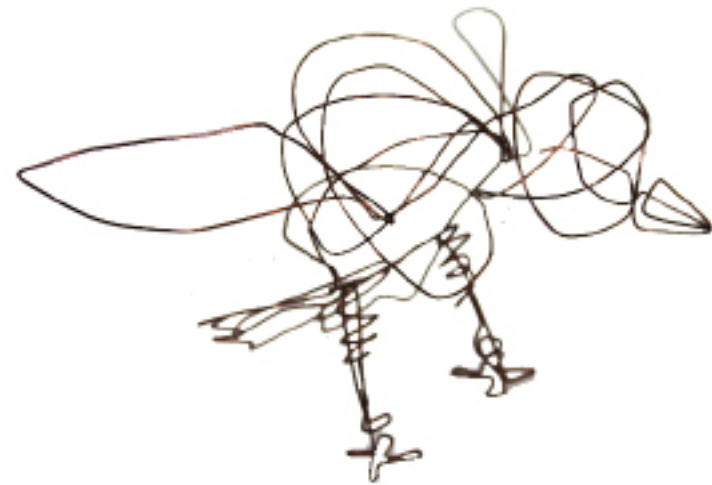

Project: Value Scales

Objective: Create three different value scales using a different poché technique for each.

Project: Figure-Ground Compositions
Objective: Study figure-ground relationships and the relationship between positive and negative space by creating shapes, and then using a tonal reversal.

Project: Working With Wire

Objective: Create a face and a bird with a continuous piece of wire.

Project: Assemblage

Objective: Use found objects and use them to create a recognizable object. The challenge was to bind them together using an unconventional way.

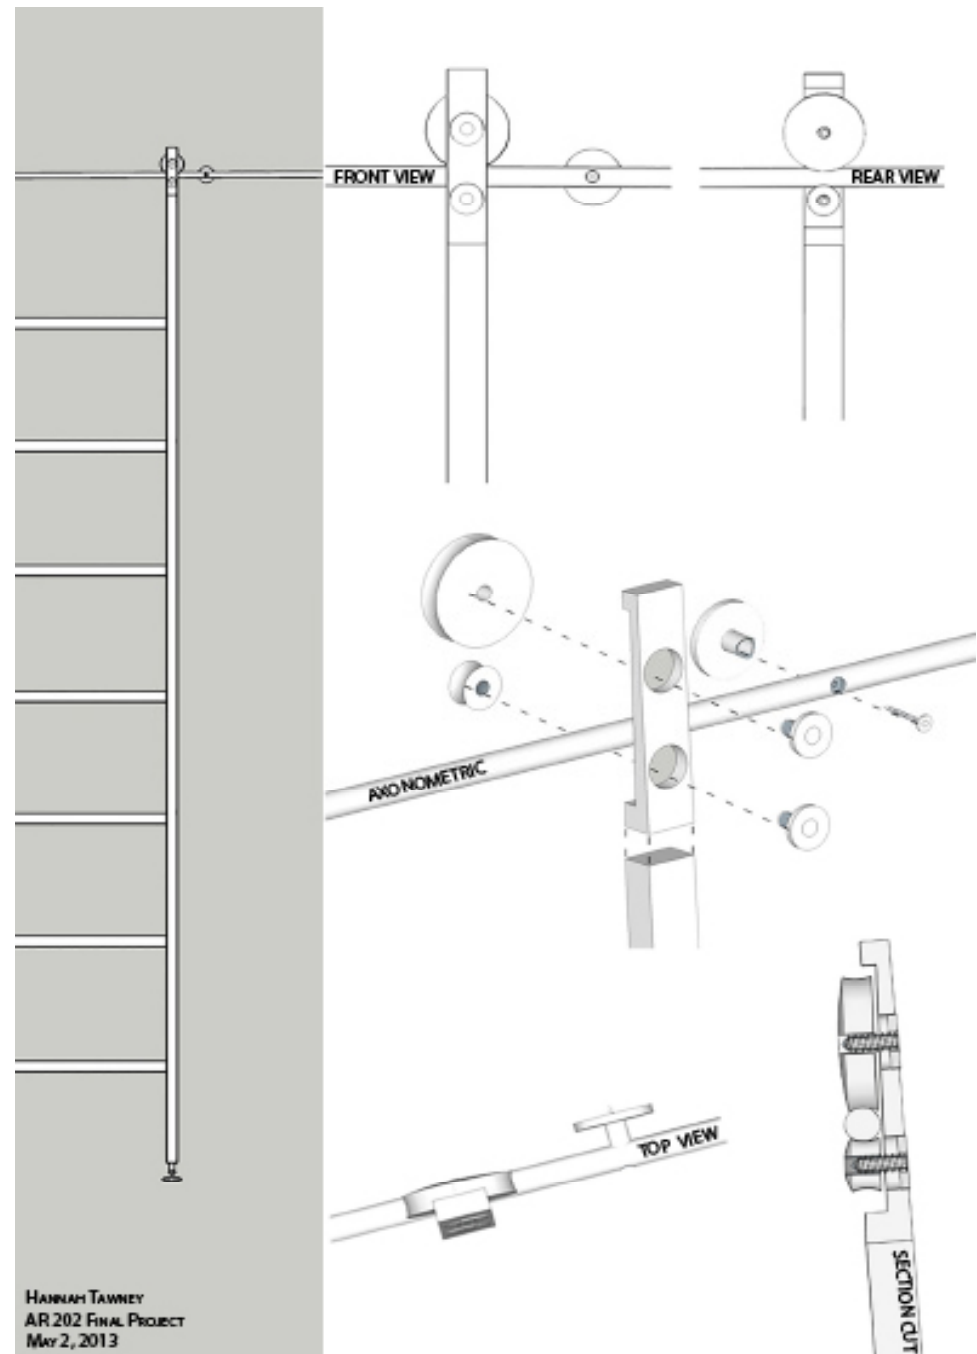

Project: Subtractive Plaster
Objective: Start with a block of plaster and carve a figure out of it, in order to look at subtractive 3-D art.

Project: Choose Your Own
Objective: Choose a project that challenges you, but also works on your specific skills within a 3-D design component.

Project: Component Composition
Objective: Build a component on Google Sketch-Up and then create a composition displaying different views of the component.

Project: Eames House Model
Objective: Build a model out of any material that includes important features of the house.

Project: Architect Composition
Objective: Develop a composition that captures the essence of the architects style of a specific house.

EAMES

ARCHITECTURE

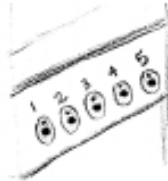

The Eames House is a modernist house designed by Charles and Ray Eames. It is a prime example of mid-century modern architecture, featuring a black and white grid pattern on the exterior walls and a dark, flat roof. The house is surrounded by lush greenery and is located in Los Angeles, California.

EAMES

The Eames Office Chair is a modernist chair designed by Charles and Ray Eames. It is a prime example of mid-century modern design, featuring a black and white grid pattern on the seat and backrest and a dark, flat roof. The chair is made of wood and is located in Los Angeles, California.
